Good Dynamics®

About Splashtop for Good Technology™

Splashtop for Good™ is built on top of the popular Splashtop Remote Desktop apps — used by more than 12 million users — and is one of the Apple® App Store™’s top 25 best-selling iPad® apps of all time. Splashtop for Good™ is a high performance remote desktop solution that allows mobile users to securely access all of their applications and files from their iOS devices.

Secured by Good Dynamics® and the Good™ NOC.

Splashtop for Good™ customers enjoy Splashtop’s legendary ease of use and performance with the added benefits of Good Dynamics® platform and Good™ NOC integration, optimizing on-device app security and control.

On-premise solution.

Hosted on your existing servers behind the firewall, Splashtop for Good™ enables you to increase user productivity and security while keeping costs and maintenance low. With Active Directory support, there’s no need for a separate database—or for users to remember additional credentials.

Cost effective and simple to set up.

Splashtop for Good™ does not need major network/server infrastructure changes or SaaS/cloud services to operate. No additional network hardware (gateways or accelerators) are required to speed up remote user sessions. Use existing applications that have already been paid for.

No VDI resources required.

By leaving corporate applications and data where they are – on the employee’s physical desktop – not only is there no data leakage, but IT is freed from the task of building VDI server farms or implementing SANs.

Support existing office and corporate applications

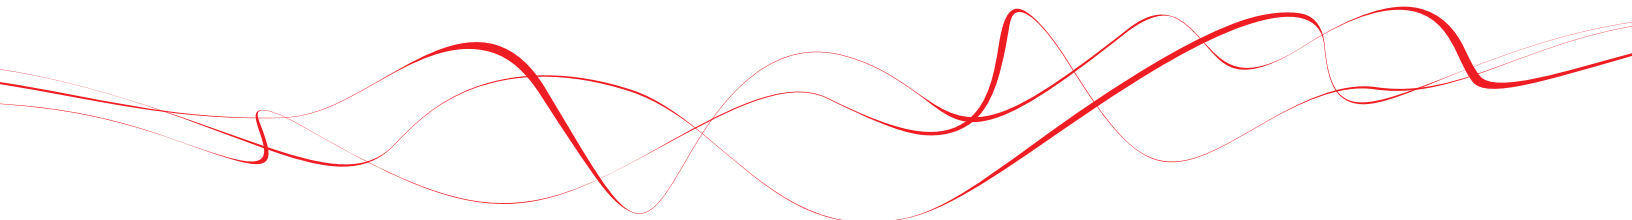

Users can enjoy a truly interactive and intuitive experience with Splashtop’s patent-pending streaming technology. The interface integrates popular mobile business apps, with no retraining required. IT no longer needs to waste resources re-engineering corporate applications for mobile users. Splashtop for Good™ is also capable of delivering 3D graphics and HD video.

Who benefits?

- IT staff can now centrally manage and secure connections between mobile devices and desktops
- Government field agents can access files and applications without downloading confidential information
- Fund managers can securely access customer portfolio information and customized or proprietary corporate applications
- Professional service consultants, associates, attorneys and legal service professionals can now better deliver for clients when away from their desks

Download Splashtop for Good™

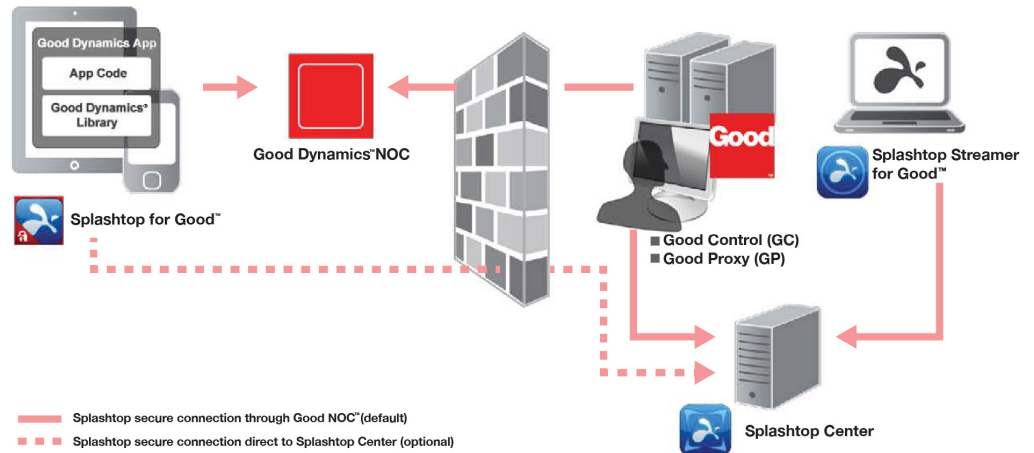

Download the Splashtop for Good™ client from the Apple® App Store™ for free.
