Supports Chromebooks, iPads, Android, Windows and Macs
Want to wirelessly mirror your iPad or Chromebook to your PC or Mac? Try out Mirroring360!
www.mirroring360.com
### Share anything. Instantly. In real time.
Share ANY application – even streaming video.
No need to reformat content for mobile devices.
No need to upload documents ahead of time.
Keynote, PowerPoint, Websites, Word documents, FLASH Videos, Online Quizzes...

### Turn your mobile device into an interactive whiteboard
Use the toolbar to draw, highlight or write over any content.
Draw over flipchart backgrounds – or include your own worksheets.
Use the spotlight and screen shade tools to keep students focused.

### Teach from all four corners of the classroom
Connect to the class PC/Mac from your mobile device.
Get out from behind your desk and improve classroom management and student attention.

### Cloud (Hosted by Splashtop)

**Individual Teachers, Schools, or Districts**
Teachers can control their computer from an iPad or Android tablet, annotate over lesson content then share their screen with student iPads, Chromebooks, Android devices, PCs and Macs.

### On-Premise (Hosted by School/District)

**Schools or districts requiring extra capacity, management or security**
Our most powerful solution.
All the features of our Cloud option but installed on internal servers, behind the firewall and integrated with Active Directory.
Includes additional management and security options.

### For IT: Easily manage hundreds of teachers and students by using our On-Premise Solution

- **Scale**: Allows an unlimited number of teachers - with each teacher able to stream their computer to up to 40 student devices. Installed on your internal server, behind your firewall and integrated with your Active Directory
- **Manage**: Policy-based console allows you to easily add/invite teachers and configure settings
- **Secure**: Set teacher and device level access, activate/deactivate users and devices, create or import SSL certs
- **Report**: Detailed history of connections and session/device information
- **Extend**: Connect to Windows RDS or VDI servers to deliver windows applications to mobile devices

### System Requirements

**Teacher Computer:**
- Windows 8, 7, Vista, XP.
- Mac 10.6.8 and above

**Student Device:**
- iPad iOS7, Android version 4 and up, Chromebook, PC, or Mac with Chrome version 28 and up

**On-premise version for school/district:**
  (Can be installed on physical server or VMs)
